

DEFINITIVE AMERICAN RELATIVE SUNSPOT NUMBERS FOR 1991

Peter O. Taylor
P.O. Box 5685
Athens, GA 30604-5685

Received: January 27, 1992

Abstract

Final values of American Relative Sunspot Numbers for 1991 are provided.
The values are based upon observations made by contributors to the
AAVSO Solar Division's international network.

The daily mean values of American Relative Sunspot Numbers for 1991 are listed
in Table 1. They were computed according to the statistical methods which were
described in Taylor (1985).

Table 1. Final Daily American Relative Sunspot Numbers for 1991

	<i>Jan</i>	<i>Feb</i>	<i>Mar</i>	<i>Apr</i>	<i>May</i>	<i>Jun</i>	<i>Jul</i>	<i>Aug</i>	<i>Sep</i>	<i>Oct</i>	<i>Nov</i>	<i>Dec</i>

Yearly Mean (1991): 144.3

The final monthly mean values included in Table 2a continue the series of values which were presented in Taylor (1987a, 1988, 1989, 1991).

Table 2a. Final Monthly Means for 1991

	<i>Jan</i>	<i>Feb</i>	<i>Mar</i>	<i>Apr</i>	<i>May</i>	<i>Jun</i>	<i>Jul</i>	<i>Aug</i>	<i>Sep</i>	<i>Oct</i>	<i>Nov</i>	<i>Dec</i>
1991	140.7	171.8	147.7	135.7	119.4	158.3	166.3	171.9	120.7	146.1	109.9	144.2

The final smoothed monthly mean values included in Table 2b continue the series which were presented in Taylor (1987b, 1988, 1989, 1991). The values were computed according to equation (1) from Waldmeier (1961):

$$R_{sm} = 1/24 [N_{i-6} + N_{i+6} + 2(\sum_{-5}^{+5} N_i)], \quad (1)$$

where N is set equal to the final mean of the month under analysis, and other means are taken accordingly. Consequently, R_{sm} always lags six months behind the more recent final mean.

Figure 1 depicts this sunspot activity during 1991.

Table 2b. Smoothed Monthly Means for 1991

	<i>Jan</i>	<i>Feb</i>	<i>Mar</i>	<i>Apr</i>	<i>May</i>	<i>Jun</i>	<i>Jul</i>	<i>Aug</i>	<i>Sep</i>	<i>Oct</i>	<i>Nov</i>	<i>Dec</i>
1990	----	----	----	----	----	----	143.4	143.4	145.0	144.8	143.9	145.2
1991	148.1	148.2	147.0	146.7	145.5	144.5	----	----	----	----	----	----
