

ERRATA

Mattei: Volume 29, Number 2, page 182: for “BHZZ. Balogh, Hungary 287” read “BZO Z. Balogh, Hungary 287”

Schmude *et al.*: Volume 30, Number 1, following page 57: due to a production error, the last two pages of the article “Photometric Study of RX Cephei” by Schmude *et al.* were omitted. The contents of those pages are given below.

Table 2. Photoelectric observations of RX Cep.

Note: V-C magnitude is value for RX Cep—HD 4853; see text.

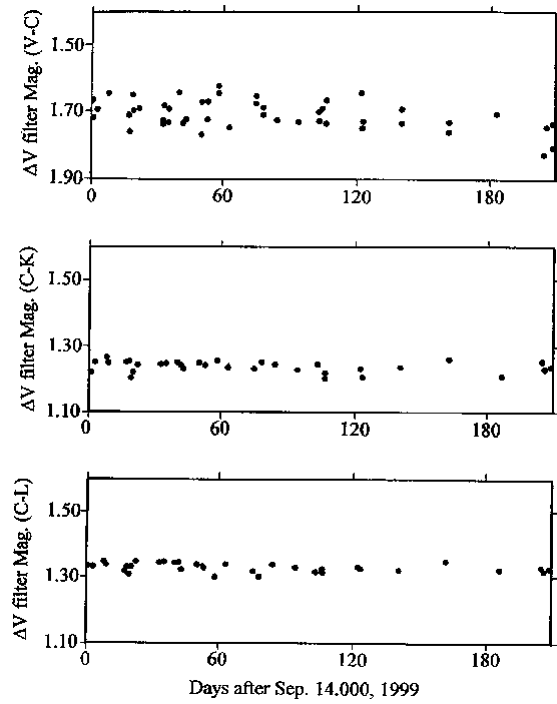

Figure 2. Plots of the V-C, C-K, and C-L magnitudes versus days after Sep. 14,000, 1999 (JD 2451436); V, C, K, and L refer to the magnitudes of RX Cep, comparison star (HD 4853), check star K (HD 5848), and check star L (HD 166205), respectively.

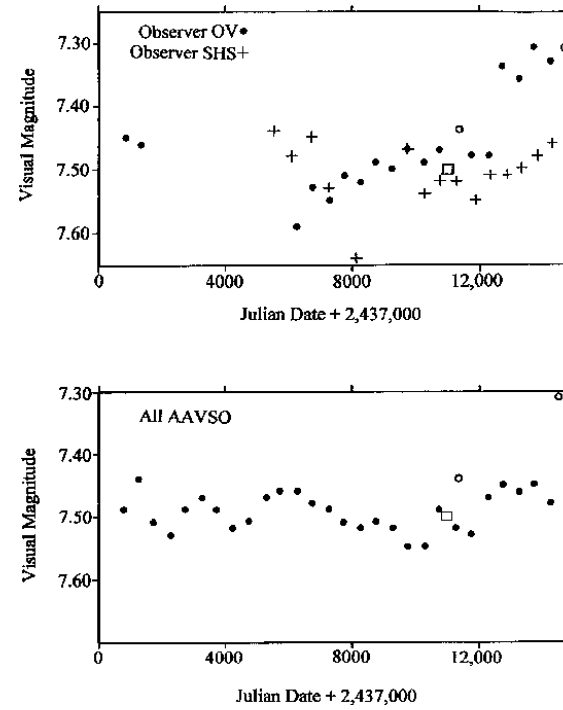

Figure 3. Plots of 500-day averages of visual magnitude versus Julian date for AAVSO observers OV and SHS (top), and all AAVSO data (bottom). Photoelectric V measurements by Zsoldos and Schude are plotted as open circles. Hipparcos values are plotted as an open square.

MISFORTUNES AS BLESSINGS IN DISGUISE

The Story of My Life

Dorrit Hoffleit

Senior Research Astronomer Emeritus
Yale University, and Director Emeritus,
Maria Mitchell Observatory

The life of Dr. Dorrit Hoffleit—world-renowned astronomer, expert on variable stars, astrometry, and the history of astronomy—is a story of hardships endured, difficulties surmounted, lessons learned, goals met, and successes attained. She has spent a lifetime at work with some of the greatest astronomers of the 20th century, and has inspired new generations of young astronomers. The American Association of Variable Star Observers is proud to publish this wonderful book. *176 pages + xviii, 18 pages of photos, with references, complete bibliography, and a foreword by AAVSO Director, Janet A. Mattei.* **\$21.00 plus \$2.95 shipping and handling.** **Order from AAVSO, 25 Birch St., Cambridge, MA 02138**
